Holiday Delays Council Meeting Until Thursday

Councillor Rindahl Appointed
As Deputy Mayor

As last Monday week was a holiday the town council met last Thursday of this week.

Mayor Cox was in the chair and councillors Rindahl, Moss, Sangster, Newnam and Bryd were present.

Elmer Conger waited on council and requested that the city be supplied to flood the skating rink in the west end of the town.

German Kitchen and members of the water committee complained that damage was done to the house and hydrant when it flooded the rink. It was finally decided to have the rink flooded only under the supervision of the town engineer.

A letter was read from the Dominion Glass Co. protesting against the rate set by council for water used at the factory.

On motion of councillor Bryd and Sangster that owing to a fluctuation on water used at the plant it is in the best interests of all concerned that the rate be left on the meter basis and that meters be placed in all districts. The motion carried.

A letter was read from the supervisor of Charities and Relief drawing attention to the changes in the system of relief.

On motion of councillor Sangster, and Bryd the committee offered by the Medicine Hospital for expenses of town residents due to the hospital.

Accounts as passed by the finance committee were approved for payment.

Councillor Rindahl was appointed deputy Mayor for the next three months.

The town form was authorized to secure stoves for the town hall and to disburse with the use of the furnace.

The auditor submitted that the town council should be authorized to correct and the town finances in good condition.

The finance committee submitted a list of delinquent taxes and rent accounts owing to the town Council.

The town council authorized the auditor to take steps to collect the accounts.

New Legion Quarters Now Being Renovated

Will Be Ready To Move Into First Year

Workmen are now engaged in renovating the interior of the Imperial Bank building which has been purchased by the local Legion.

The ground floor is being fitted up for a commodious and comfortable canteen and the upper floors for a reading room, office, and committee rooms.

The building stands out prominently as one of our main buildings and is one of the best buildings in town for this purpose.

When the alterations are completed Redcliff will have one of the most imposing and up-to-date Legion club quarters in the west.

The building is being occupied by the Legion for the next year.

Mr. W. Miller of Medicine Hat has charge of the work.

J. F. A. Arranging For Convention

Will Probably be Held in Edmonton in January

Weather the Southern Alberta U.F.A. association will hold its annual winter convention will be decided this week at a meeting of the executive.

Albert Bennett, president of the association, stated recently that the convention was being held in a convention hall.

On motion of councillor Sangster, and Bryd the committee offered by the Medicine Hospital for expenses of town residents due to the hospital.

Accounts as passed by the finance committee were approved for payment.

Councillor Rindahl was appointed deputy Mayor for the next three months.

The town form was authorized to secure stoves for the town hall and to disburse with the use of the furnace.

The auditor submitted that the town council should be authorized to correct and the town finances in good condition.

The finance committee submitted a list of delinquent taxes and rent accounts owing to the town Council.

Confirmation At St. Ambrose Next Sunday

Rev. E. H. Knowles Will Conduct Services

A number of candidates will present themselves for confirmation in St. Ambrose church next Sunday morning at the 11 o'clock service.

The Lord Bishop Rt. Rev. E. I. Knowles, D.D. will be present for the occasion.

Special effects containing the order of service are being prepared for the occasion.

There will be no Evensong.

Tariffs Slashed by Reciprocity Agreement

Reduction in customs duties on almost the entire range of allied States commodities.

Canada, says reductions of up to 50 per cent in the allied States tariff schedule on any of Canada's basic products, were effected in the reciprocal trade treaty entered into by Canada and United States.

On last Monday, the Canadian tariff schedule was amended to give effect to the reciprocal trade treaty.

The amendments, which are only 115, implement notes on automobiles, grain, fruit, and other products, mining and telecommunication.

A NOTICE GISTURE

The Ottawa Government on Monday gave out a press statement acknowledging the work done by Premier Bennett and his staff.

"Much valuable preparatory work has been done under the administration which addressed a note to the Government of the United States on Nov. 14th, 1934, requesting the initiation of negotiations."

It was a nice gesture on the part of Premier King and will be greatly appreciated," says the Lethbridge Herald.

Many branches of the Canadian Legion throughout Canada are preparing to celebrate the tenth birthday of the organization which will occur in November 25th.

A serious earthquake or fire could be a disaster for the town of Redcliff.

The town council authorized the auditor to take steps to collect the accounts.

Tilly Farmer Was Shot By Neighbor

Neighbor Was Protecting Dumb Man's Wife and Child

John Tachak, a farmer of the Tilly district, was shot and killed last Sunday by John Nelson, who is also a resident of that district.

Tachak and his wife had a quarrel and Mrs. Tachak's children took refuge at a nearby farm owned by a neighbor.

When Nelson saw Tachak on his way to the farm, he shot him. While Nelson was on his way to the farm, he shot him.

Tachak was shot in the chest and when he started to run down the cellar door, he was shot again.

Nelson was taken to the hospital and an investigation is being held.

REAR CUT IN CROP ESTIMATES

The November estimate of Canada's 1935 wheat production of some 16 million bushels, of the September estimate.

The country's crop was estimated at 273,971,000 or two million bushels less than last year.

This loss was all located in the prairie provinces and more in Alberta where the estimate was brought down to 105 million bushels.

Losses from frost cannot be the decline in the estimated yield.

Great surprise and much favorable comment is being heard at all sides at the wonderful improvement in the elaborate surroundings at the Monastery.

The Monastery has since its opening after undergoing renovation. This theatre is no longer one of the most up-to-date and conveniently equipped in western Canada.

All Relations With Italy Are Severed

League Powers Take Action To Halt War

League of Nations economic sanctions, approved by 51 nations, took effect against Italy last Monday in an unprecedented effort to force a halt to war.

These nations actually severed financial and trading relations with the invaders of Ethiopia, pledging themselves to prevent the Italian goods from their markets and to refuse to supply Italy with a select list of raw materials.

Theoretically, the economic blockade was imposed at midnight after mid-night, but legal aspects delayed some nations slightly.

With the cold weather of the past few weeks there could have been a fine sheet of ice by this time if arrangements had been made at the proper time.

Since we now have the grounds laid out and properly fenced and a fairly decent building for the accommodation of skaters it appears a shame that they should not be made use of.

With a little enthusiasm and the co-operation of citizens these rinks could be fixed up to furnish no end of healthy and interesting exercise and sport for the younger element in town.

Surely there is some organization in town, or some individual, who could get the rink under way.

"Transient Lady" at Monarch Theatre

One of the fastest moving melodramas of the year, "Transient Lady," has been booked for showing at the Monarch Theatre, starting Thursday.

Our brilliant players have the leading roles in this film. They are Gene Raymond, Henry Hull, Frances Drake and Jane Clayworth.

"Transient Lady" was filmed from the popular Octavio Roy when story of the same name, which ran serially in Liberty magazine, and is ideal entertainment for every member of the family. It is packed with dramatic situations, fast action and delightful romance and punctuated with sparkling comedy.

The story centers round a trio of wandering promoters, two men and a girl, who come to a sleepy southern town to open a skating rink.

They find a foul of an evil crowd of relatives of a crooked politician, one of this gang is killed and they try to pin the guilt on one of the skating rink promoters.

A brilliant young lawyer of the town comes to the defense of the innocent man and out of it all grows a love story, hard to watch for sweetness and appeal.

J. R. Milligan C.P.R. passenger conductor, who has been a resident of Medicine Hat for over 40 years, died suddenly Saturday morning from a heart attack.

The Social Credit group has a New Year's eve at the night for their dance at which a valuable article will be given away to the holder the lucky number.

It has been well said in regard to the result of the British general election that not before the parliamentary history of Great Britain has a government received such a vote of confidence after four years of service.

It is also the first government since the war which won two successive general elections.

British Educationists Tour Canada

In Canada for a seven weeks tour as guests of the National Council of Education, the British Educationists are at present touring the Dominion. The visit has been arranged to celebrate the 25th Anniversary of the Overseas Education League, which organizes and visits of Canadian students and teachers to Great Britain, and is a return of the hospitality extended by British educationists to the Canadian.

The British group arrived at Quebec in the Canadian Pacific liner "Empress of Australia," September 1st, and their spokesman stated they hoped to "learn quite a bit about Canada" during their visit.

Many Changes Brought About in Canada Through Motor Car Development

Canada's highways and motor cars present a striking illustration of changes brought about by progress and invention.

In the early days of settlement, roads were auxiliary to river routes as avenues of transportation. They were used during the summer season when portages were necessary to avoid obstacles to river and lake travel and during the winters when ice prevented navigation. The growth of population and the demand for means of communication between settlement points soon made necessary the introduction of overland routes, and road construction in Canada got under way in the pioneer stages of the development of the country. Exclusive of the streets in cities, towns and incorporated villages, the total mileage of surfaced roads in Canada at the end of 1934 was 93,642, of which half was in Ontario. The mileage of unpaved and improved earth roads was 136,727 miles, making a total of 406,269 miles of rural roads in Canada.

The automobile has played a most important part in Canada's road history, especially during the last twenty years in which the motor car has come to rank as the most important of a large proportion of the population. The motor car made its advent in Ontario in 1904. By 1910, thousands were registered, and from that meagre number registrations in the Dominion as a whole grew by leaps and bounds until in 1934, the peak figure of 1,232,489 in 1930. The next three years showed a slight decline, but in 1934 the automobile again gained ground with registrations totalling 1,129,323, a gain of 45,775 over 1933.

Canada has a wealth of highways and motor cars, and the extent to which the Canadian people have enjoyed the educational and recreational values of travel reflect the new and higher standards of living which progress and invention have made practically within reach of all.

Made Unlucky Catch

Torpedoes Very Nearly Brought Disaster To Fishing Boat

A torpedo weighing several hundred pounds, entangled in the net of the Hamburg fishing cutter *Frieda*, nearly brought disaster to ship, crew and cargo. The vessel, piloted by Schulze, arrived near Hamburg with the deck almost buried under fire and its lifeboats destroyed by fire. The skipper, Captain Jönck, explained that the unlucky catch was made of Holsteins, and when the head of the torpedo was hauled on deck for some unknown reason it burst into fierce flames. The deck caught fire and even the glass of the wheelhouse melted. The wheelhouse, the mast and rigging were all destroyed. The terrific heat made it impossible to fight the flames at first, but the crew later made desperate efforts to keep the flames down, fearing that the oil tank would explode. Fortunately, the fire was extinguished before the engine was affected. The crew escaped unhurt.

China Has Ignorance Tax

People Who Cannot Read Or Write Must Pay

An ignorance tax is the latest form of taxation. After April 30, 1936, anyone on the city streets who cannot explain a simple lesson in the standard Chinese primer to any policeman who questions him will have to pay a tax of one copper—the "ignorance people's tax," which is the backbone of the drive against illiteracy. More than half the citizens of Nanking can neither read nor write, and the government has decided something must be done about it.

Must Be A Good Car

Lady Modeler Makes Long Trip In Old Automobile

From Mexico City to Montreal via the Pacific coast, about 5,200 miles, in 24 days, in a 12-year-old car with some 250,000 miles to its credit is the trip recently completed by Mrs. Charles Weber of Vancouver, who motored to Montreal to visit relatives.

Mrs. Weber has driven the same automobile five times across the continent and, about five years ago, drove it on a tour of European countries. She says it is still going strong.

"That Miss Smith can't tell a thing without exaggerating."

"Did you ever see her again?"

The Best Tank Heater

Wood-Burning Fireplace Under Galvanized-Iron Tank

After trying many ways of tempering drinking water for cattle and horses, the superintendent of the Beaveridge Sub-station has decided that, for any situation where the fire hazard does not forbid the best system is a wood-burning fireplace under a galvanized-iron tank. The fireplace may be made of concrete walls long enough and wide enough to support the metal tank in which the water is to be warmed. It is convenient to have the fireplace about twenty inches deep and to have a hinged iron door at the south or west end of it, with a fireproof brick chimney at the opposite end. Do not stick a stove-pipe length in this chimney to increase the draft. It will invalidate the fire insurance on any building situated within 60 feet unless the fact is reported in the insurance company and a much higher premium paid. Many companies decline to accept insurance where a metal chimney is used. The insurance agent raised no demur when the writer proposed a concrete fireplace with a brick chimney but warned against increasing the height by using a single length of stove pipe.

Crush with the top face of the wall, a few cross bars of iron may be embedded to support the bottom of the tank, and a brick chimney but warn against increasing the height by using a single length of stove pipe. Craft may be improved and heat economy by banking with earth, except at the fireproof door, and along the side from which the animals are to drink. Some protection may be provided even there.

Old fence posts, old poles or lumber, knotty wood or willow roots grubbed from the breaking bank will fuel the fire and usually one or two fire a day will suffice.

Old Test Was Accurate

Grainmen Know How To Tell When

Grainmen know! When she wets her index finger, thrust it into a fan, and peered anxiously at the result, she was just testing for stickiness. She was utilizing what is still—even in this age of complex testing devices—on the farm, an effective way for determining whether material is cotton or linen. The finger test is effective, J. A. Nary, chief of the U. S. testing company's laboratory in the merchandise market at Chicago, explained, because linen absorbs water more rapidly than cotton. Thus when water is placed on a mixture—cotton threads running one way, linen crumpled in the other—water will soak up the circular one characteristic of pure linen.

In all cotton the spot will be circular, too, but the water will remain on the surface a long time before being absorbed.

United States Butler

Government Official Does Not Expect That There Will Be Much Need For Importation

Secretary of Agriculture Wallace pointed that there will be little importation of butter by the United States in the next year, says a dispatch from Washington.

"The question is on a percentage basis, of course," Wallace said. "You can talk about as many thousands of tons coming in and make it seem imposing, but as a percentage of the total it won't be important."

The statement was answer to a press conference inquiry as to whether he believed an increased tariff on butter, such as had been suggested by a New York group would be justified.

Plan Has Proved Success

That the experiment of the Canadian railways in the introduction of their pick-up and delivery freight service proved to be a successful one was stated at the annual meeting of Canadian National Railways Agents Association.

A movement has been started to introduce Irish stew in Irish Free State hotels.

Anasans of Ethiopia

Reported Wheat

Grain Raisers' Report Show 17 Per Cent. Graded As Rusty

Stiffed indications of the damage caused by rust to western wheat is given in the report of the statistician of the board of grain commissioners on the movement of western Canadian grain for September. Approximately 17 per cent. is graded as "rusty." Improvement in exports of wheat is foreseen.

The export movement of Canadian grain to overseas destinations has been slow since the first two months of the crop year. There are, however, abundant indications of a substantial improvement developing.

Now that the movement from country points is in full swing, a better idea of the effect upon this year's crop of rust and unfavorable climatic conditions is obtainable. Using the inspection reports for the first nine days of October as a basis of calculation, 17 per cent. of cars of bread wheat graded into the "rusty" (rusty) wheat grades and feed, 14 per cent. graded number 5 and 6 and 4 per cent. 3 northern and better.

The heavy increase in the proportion of light-weight grain is reflected in the lower average weight per carload unloaded at the terminals. 1,474 bushels in September as compared with 1,518 bushels a year ago.

The SNAPSHOT GUIDE

SHADOW SHOOTING

Shadow pictures are easy to make. If you haven't your own camera, a shutter speed of 1/250 of a second was fast enough to stop action and still give the proper exposure. Shadow pictures are easy to make. The main requisite is a good, strong sun in the late afternoon or early morning. Late afternoon, perhaps fifteen or twenty minutes before the sun starts gradually to disappear below the horizon, is preferable. Your light is usually stronger at this time and casts deeper and sharper shadows.

The two pictures above are only a couple of examples of the many shadow pictures to be taken with the aid of a strong sun. The picture to the right was the result of an alert amateur's "nose for picture."

"The speed of a camera on a percentage basis, of course," Wallace said. "You can talk about as many thousands of tons coming in and make it seem imposing, but as a percentage of the total it won't be important."

The statement was answer to a press conference inquiry as to whether he believed an increased tariff on butter, such as had been suggested by a New York group would be justified.

Experts Of League Give Advice On How To Cure Crisis In World Trade

Geological Survey Work

Large Areas In West Are Found Favorable To Prospecting

Large areas of territory favorable to prospecting have been brought to light in the report of this season's geological survey work which sent 188 parties to the field in 65 projects financed by \$1,000,000 provided under the supplementary public works act.

The surveys found territory suitable to prospecting for gold and at least one promising silver area. Those geologists who have already returned from the field are busy preparing their reports which will be made available to prospectors next year.

Surveys in one area of the north-west territories revealed about 2,000 square miles of good prospecting ground, for precious metal deposits and one occurrence showing free gold was stated by prospectors in the wake of one of the government parties.

One of the Manitoba projects reported it had mapped 200 square miles of favorable gold prospecting ground. Some prospecting areas were found in Northern Saskatchewan, while a British Columbia party found that it had made of tertiary gold-bearing gravels overworked in the early placer mining days when the district yielded rich rewards.

In an area west of Lake Superior copper-nickel mineralization of the Hudson type was found. Sporadic occurrences of silver, lead, zinc and economic significance, occur over a distance of 14 miles. Three hundred square miles in the same district were found favorable to occurrence of silver.

May Not Sign Contracts

Kansas Farmers Not Sure Wheat Production Should Be Restrained

Whether or not what control contracts will be signed by Kansas farmers under the United States Agricultural Adjustment Act apparently rested largely in the hands of the war gods hovering over the old world. The 1935-1936 year and the tense European situation were being watched closely by the farmers.

The fact the United States already is importing Canadian wheat due to reduced domestic supply led to speculation whether the planners of the act would be able to follow a new curtailment program. A.A.A. sign-up success would keep fully 6,000 acres of Kansas out of production, an area that normally yield 6,000,000 to 10,000,000 bushels annually.

Limitation Of Gas Sale

Opposition To System Of Quotas Heard In Alberta

Definitely opposing a system of quotas or any limitation of the sale of natural gas in Alberta, H. R. McLean, M.C., president of the north-western United States, Ltd., presented a brief to Sir Montague Barlow, in the investigation into Alberta's coal industry.

Limitation of sales would be impracticable, unfair and discriminatory to the general public as well as to the gas company. Mr. McLean contended. He charged inconsistency in a claim by coal dealers that if it had not been for gas 250,000 additional tons of coal would have been sold in Edmonton in 1934.

Not Cured By Quotas

Although ancient Rome had numerous temples, there were never any of outstanding destruction. Some historians contend that many of the Roman palaces and temples had been destroyed by barbarians between the fifth and sixth centuries were really shaken down by quakes.

Sermon Was Appropriate

To avoid confusion when lights failed in the Central Baptist church at Saint John, N.B., during a hymn, Rev. Dr. Bruce D. Knott immediately began his sermon. The subject was the fire-flood virgin who neglected to have their lamps filled with oil. The services ended in darkness.

Nominal Candle

Enrico Caruso's memorial candle, which was 16 feet high, five feet in circumference, and weighed one ton, which first lighting, it burned one ton each year—all saints' Days—and will last 15 centuries, it is said.

Rhodia is exporting more coffee, hides and gasoline than at this time last year.

JOHN VAN GULDER

"Physician, heal thyself!" Well might that mocking cry epitomize the advice of economic experts of the league on how to cure the crisis in world trade, says a report from Geneva.

Everywhere doctors—individuals and governments—are at work. They are employing purely national remedies for the disease. "The doctors have not yet been able to agree," a report of the league's economic committee comments in tone of disappointed reproach, "and it has so far been impossible to attack the disease in the proper way—i.e., internationally."

"Accordingly, the malady from which the world is now suffering is no local ailment, the crisis not rather the inability of the countries to co-ordinate their several efforts in the fight against the crisis. The inability to emerge from the crisis is a result of the paralysis of the international circulation, the regular operation of which is indispensable to the welfare of the civilized nations."

The sixteenth assembly of the league represented the crisis not its meaning to free international trade. The secretary of state for the United States sent a telegram of approval. Recovery of trade, the assembly resolution held, would be agreed by the conclusion by as many countries as possible of bilateral agreements having for their object the application of a more liberal policy to the trade of the world. Further that the beneficial effects would be more widespread when based on the principle of the most-favored-nation treatment. Industrial experts are, in addition, to be consulted with a view to finding a solution for agricultural depression.

And documents submitted present a revealing picture of a world where doctors are at work. The crisis is emerging. The first is the steady and very substantial recovery in raw materials and in the production of industrial activity. The second is the almost complete stagnation of international trade.

Canada To Gild Shelter Belt

125 Miles Of Planting Finished In Six States

A start has been made on the great Canada-to-the-Gulf shelter belt about which so much was said and written a year ago, according to an announcement in the January Number published by the American Tree Association, Washington, D.C.

Paul H. Roberts, executive director at Lincoln, Neb., says in the Digest that 125 miles of shelterbelt plantings have been completed in the six states traversed by the zone. An additional 5,317 acres of special tree plantings on 1,926 farms have been completed. This later planting was made in co-operation with farmers.

On the 649 acres of land now under lease for nursery purposes, seedlings are being rapidly completed and a number of the species are up. Harrowing extreme weather conditions or unforeseen insect infestations, it is expected about 75,000,000 seedlings will be produced.

North Dakota, with 36 miles of strip plantings has the largest volume. South Dakota with 28, and Kansas with 24, are close contenders. The mileage planned this year was very largely restricted by the amount of suitable nursery stock available, because of the late start in the year.

The wide climatic conditions encountered throughout the shelter-belt zone, make it necessary to grow a variety of trees to meet the variety of conditions. Each state must plant to meet its own particular needs.

Legend Of Navajo Indians

Mothers-In-Law Are Reincarnated As Bears After Death

Mothers-in-law, says a Navajo Indian legend, are reincarnated as bears after they die. A 20-year-old black bear was no troublemaker, even for a mother-in-law, so M. E. Mungru, director of the Montana department of conservation, predicted, shot it. Navajo squaws barred the doors of their hogans, snarl howl (gosh) and snarl (gosh) and snarl (gosh) to the bear's departed spirit. Indians who had taught the bear's carcass were put through a cleansing ceremony by a medicine man to turn the departed spirit into a pine tree.

WORLD HAPPENINGS BRIEFLY TOLD

Robert W. Dabson, statistician and economist, predicts the United States will be out of the depression in six months and headed for prosperity.

Winnipeg's death rate has been cut almost in half in the past 25 years, health department figures show. In 1910, the rate was 24.6 per 1,000 population. Last year it was 7.6.

At two mass meetings in Kingston, Jamaica, "congratulations" were extended to Great Britain for its stand against Italy before the League of Nations.

Sixteen persons were killed in Moscow when an eight-story building collapsed during construction. The number of injured was not immediately known. A building on the same site collapsed in 1913.

Jackie Cooper of Jupiter Park, Alta., riding "Blondie" to victory, captured first prize in the cowboy's saddle break riding contest at the 10th annual world's championship rodeo at Madison Square Garden, New York.

A finding that the Mexican government "is seeking the abolition of religion" is contained in a report of a delegation sent to that country last summer by the American committee on religious rights and minorities.

A host of gift certificates from the U.S. Secretary of the Treasury Andrew W. Mellon has given more than \$150,000 to be given to a building and site for a national art gallery in Washington.

J. Grove Smith, Dominion fire commissioner, told a service club for fire departments in various Canadian cities needed \$10,000,000 worth of new equipment to fill replacements and increase protection during the depression.

Latest in Motorbikes

Luxurious Room for Passengers On

Denmark's New Frigate
The motorship Canada, newest and finest ship of the Danish East Asiatic Line's fleet, arrived recently on her maiden voyage from Europe to Port of Vancouver.

Captain C. Knudsen, well-known in the port, formerly master of the company's America, commands the new Canada.

Canada showed the port of the latest in modern ship architecture, with refinements that have been inspired by travel competition.

She is an up-to-the-minute freighter, with refrigerated space, in addition to regular cargo space, for 70,000 boxes of fresh fruit.

But it is her luxurious passenger accommodation for 85 passengers which will attract the attention of London. Beauty and convenience are allies aboard Canada.

Appointments include a large dining room, which seats all passengers, luxurious social rooms which include a smoking saloon, ladies lounge, dance foyer, cocktail bar, children's dining room, and a built-in swimming pool—the first on any ship flying between the Pacific coast and Europe direct.

In the smoking saloon are paintings by Rithelhof of Denmark's most-famed scenic spots.

In the dining room is a painting of Frederiksborg Castle by Axel Johannsen.

All rooms on the new ship are air-conditioned, all are outside and equipped with standard beds. Seventeen of the 25 double staterooms have private baths. There are five single rooms.

The secret of Strindberg's violin, varnish, soft in texture and shading from red to orange, has never been discovered.

More than 100,000,000 buttons were exported from the Philippines this year.

They that govern the most make the least noise.

VICKS COUGH DROP
Medicated with ingredients of Vicks VapoRub

Using Different Principle

Energy of Sea Will Propel New German Liner

Resembling a ferocious monster of the deep, an ocean liner is being designed in Germany to make use of the sea's unlimited energy as a propelling medium.

The ship will have an opening in its bow that will give it the appearance of a giant whale swimming over the water with its jaws ready to devour anything in its path. This opening will gather up the ocean waves and pass them through the ship. The water will be ejected by means of spouts along the sides of the liner. The water, forced out under pressure, is expected to drive the ship forward at great speed. As a result the expense of operating a liner is expected to be reduced, says "Modern Mechanics."

Within the mouth of the ship will be an observation platform and a row of windows, through which passengers may watch the waves surging into the hold. The unusual liner will be streamlined to increase its speed.

R. J. May, an engineer of Pirna, Germany, conceived the idea for the novel ship. He plans to install a large suction pump at the bow of the liner's mouth. This will draw up the water and force it under great pressure into the pipes. The spouts along the side. The electric motor driving the fan will be powered by a Diesel engine.

May plans to build a model which will be tested on the Elbe river near Dresden, capital of Saxony. If tests are successful, the engine will be sent to interest steamship companies in his project.

Under ordinary liner which has propellers at the stern only, May's ship will have nine points of propulsion. These are the nine spouts located at the sides and stern.

Board Paid By Criminals

Michigan Will Collect From Convicts Able To Pay

Honest taxpayers of Michigan no longer are required to pay all the upkeep of convicted criminals. At its last session, the State Legislature enacted a law providing that, if they are financially able, convicts must pay to the State the cost of keeping them under lock and key.

The law is modeled on the statutes in effect in several States, including Michigan and New York, under which inmates of asylums for the insane are required when able, to pay for their maintenance.

Under Michigan's new law, the State may seek to reimburse itself for the cost of either old or new inmates. It is provided that proceedings "may be begun at any time after admission" to penal institutions, and collections may be made over the entire period of confinement—Literary Digest.

Record In Freak Writing

Man Pens 1,741 Words On Twenty-Five-Cent Piece

A new record in freak writing has been set up by a 70-year-old soldier, William Albert of Winton, British Columbia.

Within a circle covered by a Canadian 25-cent piece he has written with pen and ink a rhyme history of Horneburg consisting of 7,779 letters in 2,761 words.

He has put eight pages of poetry outlining the town's history in German and Norman times into that circle. By putting Horneburg's history under the microscope he has "proved himself a genius in penmanship."

This example of concentrated history, viewed by the naked eye, looks something like a greasy thumb-print, but with a powerful lens one can read it.

Organist Wins Prize

Wins Competition Sponsored By L.O.R.E. of Winnipeg

Walter MacNeill, A.T.C.M. organist and choir director of Trinity Anglican church, Barrie, Ont., received word he had been awarded first prize of \$50 in a nation-wide competition sponsored by the Assiniboine chapter, L.O.R.E. of Winnipeg, for the best musical composition submitted by Canadian composers.

Mr. MacNeill named his composition "Take Me To A Green Island."

Mrs. Lillian J. Edward, Winnipeg, chairman of the musical committee of the chapter, informed Mr. MacNeill the song would be used in full concert work in Winnipeg.

"Walter, my bill,"
"What did you have sir?"
"I don't know."
"You don't know?"
"No, I ordered a tender steak."

The snicker a man is the more agreeable he tries to be.

Protection Of The Nile

Is Essential To Welfare Of Egypt And The Egyptian Sudan

According to a report from London, British India will, in case of need, furnish a large body of troops for the defence of British Somaliland, which borders on Ethiopia, in the neighbourhood of the Italian colonies. It is added that to certain eventualities a British expeditionary force from Great Britain may be required to protect the regions of Italian Tripoli, in Ethiopia. The protection of Lake Tana is essential to the welfare of Egypt and the Egyptian Sudan, because it is one of the sources of potential auxiliaries of the Nile. And the Nile, as every student of history and geography knows, is the mother and father of time in the lands of people who dwell in the vast Nile valley. The overflow of the river furnishes the otherwise desert soil with water. British engineers have spent hundreds of millions of dollars in building the Aswan dam and other dams on the Nile in order to flood and irrigate the territory where the Egyptians cultivate their crops. To do so is to interfere with the vital agency in the prosperity of the country would doom tens of millions of people to starvation.

The protection of the Nile is one of the white man's burdens long ago assumed by Great Britain—Toronto Mail and Empire.

Runs For Fifty Minutes

German Inventors Have Patented New Gramophone Record

The gramophone record that will run on for nearly as long as end-to-end, just fifty minutes—without stopping, has been patented by two German inventors, Herr Bass and Professor Vorwerk, after long and arduous research.

The new gramophone record, which is not as perfect as many would expect, but has many other technical working in the same field. Experts estimate that with the results, have nevertheless come to the conclusion that the rendering of music and song is not as perfect as many would expect, but has many other technical working in the same field. Experts estimate that with the results, have nevertheless come to the conclusion that the rendering of music and song is not as perfect as many would expect, but has many other technical working in the same field.

The non-stop record will therefore be principally used in schools and for political purposes. Speeches will suffer less from interruption at a crucial point than before, and it is thought to be in the schools of the future long passages from the classics spoken by men and women whose education in good will bring home the beauty of language to literature classes.

Household Arts

County and city authorities of Vancouver, Washington, face a perplexing situation in the case of Mrs. Maude Smith's home, which sits half in the city and half in the county. He sits his brother-in-law and reads the morning paper in the county. How much to charge Smith in taxes by both officials is their problem.

Sept. 1935 Sept. 1935 Sept. 1935
Carloadings of revenue freight 76.9 76.8 76.5
Construction contract awards 64.2 64.1 63.2
Bank deposits 85.5 85.7 84.9
Electric power production 100.9 100.5 100.0
Combined weighted index 81.3 81.5 79.7

Has Highest Death Rate
The highest death rate in the world according to statistics just published comes from Skopje, a town in Southern Yugoslavia. Twenty-four out of every 1,000 inhabitants die each year there—the average rate for the rest of Europe. Lack of hygienic treatment for babies and a widespread tubercular infection of cows are stated to be the causes.

Tax Men Puzzled

Restaurant Pies
Expert Tells Of Shortcomings Of Modern Cookery

Those "pies" which restaurants list on their menus may not be pious at all, but puddings, if the word of Monroe ("Boston") Struss, lecturer, consultant of Los Angeles, is accepted. Struss, billed as the "American pie-making champion," arrived in Chicago recently to tell the National Restaurant Association the shortcomings of the restaurant pie. "Compliments of 'sappiness,' 'tough crust,' and 'corn starch stiffs' in restaurant pies are 'fully warranted,' he said."

Gave Inventor Ideas
While helping a woman lift a heavy vessel from a well, William Woodhouse noticed a piece of broken crock fastening on the water. Tying with the crock, he was surprised to see it lift itself, time after time, and this gave him the idea for a self-lifting lifeline.

Approximately one-half of the people now alive in the Soviet union are less than 20 years of age.

Scotland's epidemic of enteric fever is believed to have been started by pilgrims returning from Lourdes.

Poland has a city-beautiful campaign.

Far Shortage Of Ships For Vimy Pilgrimage

Railways Grant One Hundred Per Mile Rate—Applications Pending At Rate Of One Cent Per Week

Canadian Great War Veterans and their next-of-kin are taking on the special pilgrimage trains leave Montreal for overseas in July next. Mr. Ben Allen, Dominion organizer for the Vimy and Battledieu pilgrimages, who has just returned from England, France and Belgium, announced that reservations to date amount to 2,000 and expresses fear that thousands of Canadian war veterans and their next-of-kin may be disappointed in failure to obtain passages unless applications are filed immediately.

"We have just returned from meeting the steamship people, stated Mr. Allen. The number of ships that will be sent to Europe is very small. Reservations are in early. It will be the greatest competition for the boats may not be available unless reservations are in early. It will be the greatest competition for the boats may not be available unless reservations are in early. It will be the greatest competition for the boats may not be available unless reservations are in early.

Employers everywhere are extending the greatest competition for the boats may not be available unless reservations are in early.
